

MAIN STREET LUXURY VINYL COLLECTION

MAIN|STREET

RESIDENTIAL LVP

Delivering Lasting Value To The Home.

Never underestimate the value of the right combination of performance and style. Main Street hits the perfect balance for residential spaces with durable waterproof construction and high-definition wood looks.

Pet Friendly

Messes stay on the surface and do not penetrate or go under the floor.

Scratch Guard

Highly abrasion-resistant coating provide shine and increases the lifespan of your floor.

Advance Bond Backing

Reduce more than 80% of most common installation faults by pairing Level Seven products with Urban Surfaces glue systems.

10 Curated Designer Colors

A focused selection of premium colors and textures to ensure the perfect floor for your designer vision.

Installation Patterns

GlueDown vinyl flooring can be installed in a variety of different patterns like Subway or Herringbone. Each layout creates a unique look and feel, creating a distinct space.

Build Responsibly

All products have been independently certified by SCS to comply with the volatile organic compound emissions criteria of the California Sections 01350 standard. Any product that has met these stringent standards is a product that will contribute to good IAQ.

Available in 1 & 4 Gal

Shelf life 2 years

CREATE INSPIRING SPACES.

Why hard surface flooring?

Hard surface floors are easy to clean and maintain because they provide a one-dimensional surface that doesn't absorb odors, spills, dust, or soil. They also don't retain moisture, which can lead to microorganisms such as dust mites and mold.

What are you breathing?

Research by the RFCI shows that on average a person will spend 90% of their life indoors. Whether it be in your working environment, your home, or sitting in a movie theater, you will spend a majority of your time inside. When this is realized, you may want to know how healthy the air quality is, and rightly so. A recent study done by the Environmental Protection Agency (EPA) found that indoor air was deemed two to five times more harmful than outdoor air. This is due to many harmful pollutants including radon, mold, and carbon dioxide found indoors. Healthy air contributes to better learning in schools, improved productivity in offices, and more comfortable homes. Poor indoor air quality (IAQ) can be a factor in a variety of health problems, such as headaches, dizziness, and more serious long-term effects.

by **SCS**certified.

BUILD RESPONSIBLY.

Why FloorScore?

When it comes to indoor air quality, a primary concern is the emission level of specific volatile organic compounds (VOCs). FloorScore® IAQ Certification means that a flooring product is independently certified by SCS Global Services to comply with the volatile organic compound emissions criteria of the California Section 01350 Program. Hundreds of resilient flooring materials and their adhesives bear the FloorScore® seal. This seal tells you that the products have been independently certified by SCS to comply with the volatile organic compound emissions criteria of the California Section 01350 standard. Any product that has met these stringent standards is a product that will contribute to good IAQ.

FloorScore Requirements?

To earn the FloorScore® seal, a flooring product must satisfy the requirements of the SCS-EC-10.2-2007 Environmental Certification Program – Indoor Air Quality Performance.

Which Includes:

- Testing demonstrating compliance with emission concentrations for listed VOCs under California Section 01350
- Manufacturing facility on-site audits and yearly surveillance audits
- Annual product re-testing
- Product record keeping
- A documented quality control plan
